

**How important is having enough police and community support officers to keep your community safe?**

## The UK Government doesn't value our police force.

- The cost of living has increased by 24% in the last seven years
- In that time the pay of police staff in Wales and England has increased by just 7.2%
- UNISON doesn't think that's fair and we're campaigning for a decent increase in police pay in 2019.
- If you agree send a message to your MP and let them know what you think.
